

List of Posters: Powders & Grains 2025

IRIS Hall: Poster # 1-48

IVY Hall: Poster # 49-96

- P1 **Generalization of the $\mu(I)$ rheology to account for flow type**, *Harkirat Singh* [epjconf250494], 2-Rheology and constitutive modelling
- P2 **Impact of the fines content on stress fluctuations in bi-disperse granular mixtures during triaxial tests**, *Pierre Philippe* [epjconf250614], 10-Experimental methods for granular mechanics
- P3 **(Dis)continuous shear thickening in frictionless granular media?**, *Stefan Luding* [epjconf250760], 4-Jamming, rigidity and shear-thickening transitions
- P4 **Rheology of cohesive granular material with tuneable cohesive strength**, *Sanyogita* [epjconf250737], 2-Rheology and constitutive modelling
- P5 **Rheology of dilute granular gases with hard-core and inverse power-law potentials**, *Yuria Kobayashi* [epjconf250507], 3-Kinetic Theory and Granular Gas
- P6 **Modelling the breakage of a spherical agglomerate in a vertically vibrated granular bed**, *Alok Tiwari* [epjconf250676], 11-Powders and grains in pharma- and food processes
- P7 **Soil-Geocell interfacial interaction subjected to different strain rates**, *Sureka Sekar* [epjconf250418], 7-Geomaterials
- P8 **Photoelastic Grain Solver v2.0: an updated tool for analysis of photoelastic force measurements in granular materials**, *Ted Brzinski* [epjconf250207], 10-Experimental methods for granular mechanics
- P9 **Packing behavior of cohesive deformable grains**, *Saeid Nezamabadi* [epjconf250738], 4-Jamming, rigidity and shear-thickening transitions
- P10 **Anomalous dynamics of colloids and their cluster formation in active liquids**, *Vijay Chikkadi* [epjconf250766], 12-Emerging topics
- P11 **Revisiting dense granular flow dynamics: compressibility and nonlocality on inclined surfaces**, *You-Yu Chang* [epjconf250527], 2-Rheology and constitutive modelling
- P12 **LBGraIn: An efficient multiscale lattice Boltzmann model for granular flows**, *Yuri Sobral* [epjconf250575], 9-Particle-based numerical methods
- P13 **Segregation patterns in binary fluidization**, *Kamal Pandey* [epjconf250779], 5-Polydispersity, segregation, and pattern formation

- P14 **Experimental investigation of laboratory-scale granular landslide impacting on dry and liquid surfaces**, *Vikas Sharma* [epjconf250529], 6-Geophysical, environmental and planetary processes
- P15 **Influence of direction and rate of removal of confining gate in DEM based granular column simulations mimicking dry granular flows**, *Aman Ujjwal* [epjconf250723], 6-Geophysical, environmental and planetary processes
- P16 **Impact of wavy surfaces on particle-laden Poiseuille flow**, *Rajaram Lakkaraju* [epjconf250571], 8-Particulate multiphase flows and porous media
- P17 **Implementing van der Waals forces for polytope particles in DEM simulations of clay**, *Dominik Krenzel* [epjconf250215], 9-Particle-based numerical methods
- P18 **Viscous avalanches on a spherical minor planet**, *Deepayan Banik* [epjconf250605], 6-Geophysical, environmental and planetary processes
- P19 **Influence of strain rate on strength and deformation of granular material: A DEM based study**, *Sagar Biswas* [epjconf250733], 7-Geomaterials
- P20 **Discharge of spheres and dumbbells mixed with fine grains from a 3D silo**, *Sandip Gharat* [epjconf250741], 5-Polydispersity, segregation, and pattern formation
- P21 **Unsaturated wet granular materials rheology: a study using X-ray microtomography and deep learning models**, *Abdoulaye Fall* [epjconf250421], 2-Rheology and constitutive modelling
- P22 **Nanostructures on glass surfaces fabricated using HF gas etching for reducing adhesion forces of dust particles**, *Ryudai Nitano* [epjconf250574], 10-Experimental methods for granular mechanics
- P23 **Impact of an obstacle on granular flow through apertures**, *Deepak Sharma* [epjconf250603], 9-Particle-based numerical methods
- P24 **Contact numbers in packings of frictional cylinders**, *Matthias Schröter* [epjconf250725], 4-Jamming, rigidity and shear-thickening transitions
- P25 **A simple micro-inspired model for granular materials made of hollow crushable particles**, *Gael Combe* [epjconf250554], 7-Geomaterials
- P26 **Steady state behavior of spherical intruder impaction in vertically vibrated granular beds**, *Devidas Godse* [epjconf250749], 6-Geophysical, environmental and planetary processes
- P27 **Extended hydrodynamic equations for binary granular mixtures**, *Ramakrishna Rongali* [epjconf250132], 3-Kinetic Theory and Granular Gas
- P28 **Heterarchical model of comminution in high pressure grinding rolls**, *Mukesh Bisht* [epjconf250535], 9-Particle-based numerical methods

- P29 **Experimental observations of traction on grooved rods pulled from within cylindrical silos containing grains**, *Javier Hernández-Juárez* [epjconf250613], 10-Experimental methods for granular mechanics
- P30 **Drag and lift forces when moving in a cohesive granular medium**, *Denis Dumont* [epjconf250528], 2-Rheology and constitutive modelling
- P31 **Yielding behaviour of granular packings under constant pressure cyclic shear**, *Krishna K Tiwari* [], 2-Rheology and constitutive modelling
- P32 **Modeling frost heave in silty soils**, *Dilip Gersappe* [epjconf250545], 8-Particulate multiphase flows and porous media
- P33 **Effect of electric charge on dispersion and spatial distribution in particle-laden turbulent flows**, *Pascal Fede* [epjconf250007], 8-Particulate multiphase flows and porous media
- P34 **Shear localization in quasi-two-dimensional frictionless hydrogel layer controlled by packing fraction and system geometry**, *Yuto Sasaki* [epjconf250582], 2-Rheology and constitutive modelling
- P35 **DEM modelling the effect of overlooked finer fractions for a vibrating screen**, *Lokeshwar Mahto* [], 9-Particle-based numerical methods
- P36 **Effect of sintering on aeolian snow erosion**, *Abdou Khalil* [epjconf250567], 6-Geophysical, environmental and planetary processes
- P37 **Localization and deformation in laponite sand mixtures**, *Tejas Murthy* [epjconf250671], 7-Geomaterials
- P38 **Impact of roll gap and screen size in the post-compaction dynamics of roller compaction and mill system: a DEM study**, *Tarun De* [epjconf250719], 11-Powders and grains in pharma- and food processes
- P39 **Transient mechanics in dense hydrogel suspensions**, *Tommaso Pettinari* [], 2-Rheology and constitutive modelling
- P40 **3D Dynamic analysis of concrete bending beam using DEM with breakable aggregates**, *Michal Nitka* [], 9-Particle-based numerical methods
- P41 **Compressive wave speeds in dry, confined granular mixtures**, *Kokkonda Vikas* [epjconf250721], 10-Experimental methods for granular mechanics
- P42 **Dilute gas-particle flow through a vertical axisymmetric pipe**, *Mudasir Ul Islam* [epjconf250513], 3-Kinetic Theory and Granular Gas
- P43 **Particle-based modeling of continuum quasi-fragile matter fragmenting into granular-like packing**, *Gael Combe* [epjconf250543], 9-Particle-based numerical methods
- P44 **Compaction mechanics of soft-rigid mixtures considering realistic particle morphology**, *Ramesh Kandasami* [epjconf250623], 7-Geomaterials

- P45 **Machine learning for prediction of dynamical clustering in granular gases**, *Sai Preetham Sata* [epjconf250503], 12-Emerging topics
- P46 **Efficient numerical integration of rigid body dynamics**, *Jose Daniel Munoz* [epjconf250718], 9-Particle-based numerical methods
- P47 **Topological signatures of jamming in granular force networks via persistent homology**, *S. Vishali* [epjconf250746], 4-Jamming, rigidity and shear-thickening transitions
- P48 **Prediction of small-strain properties of dry sand using curve fitting and machine learning models**, *Pramay Bhatpahari* [epjconf250512], 9-Particle-based numerical methods
- P49 **Transient size segregation of binary granular mixtures**, *Soniya Kumawat* [epjconf250561], 5-Polydispersity, segregation, and pattern formation
- P50 **Bins discharge limited by elastic gates**, *Abraham Medina* [epjconf250618], 10-Experimental methods for granular mechanics
- P51 **The simple model to estimate the force exerted on the sphere rolling up a granular slope**, *Takeshi Fukumoto* [epjconf250488], 2-Rheology and constitutive modelling
- P52 **Dynamic Brazilian split tests on gypsum as a model material for soft rocks**, *Peerzadi Arzeena Imtiaz* [epjconf250004], 7-Geomaterials
- P53 **Angular momentum transport and its scaling in co-rotating suspension Taylor-Couette flow**, *Manojit Ghosh* [epjconf250672], 8-Particulate multiphase flows and porous media
- P54 **Determining granular behavioural zones in rotating tumblers**, *Francois Guillard* [epjconf250587], 9-Particle-based numerical methods
- P55 **Waves in granular flows down a vertical chute**, *Gauri Pachpande* [epjconf250734], 5-Polydispersity, segregation, and pattern formation
- P56 **CFD-DEM simulations of mixing in dense and dilute flows**, *Balazs Füvesi* [epjconf250523], 8-Particulate multiphase flows and porous media
- P57 **Quantifying influence of particle morphology during shallow indentation of a granular ensemble**, *Bupendra Chand* [epjconf250720], 10-Experimental methods for granular mechanics
- P58 **Overcoming flow characterisation challenges and enhancing handling equipment selection for biomass and biowaste materials**, *Vivek Garg* [epjconf250771], 6-Geophysical, environmental and planetary processes
- P59 **Influence of brush fibers on sand ejection by a pendulum swept**, *Yuto Ochi* [epjconf250893], 6-Geophysical, environmental and planetary processes

- P60 **Physics-based vs data-driven constitutive modeling of granular media down an inclined plane**, *Raul Cruz Hidalgo* [epjconf250606], 2-Rheology and constitutive modelling
- P61 **Dynamics of cooling in viscoelastic granular gases**, *Purnendu Pathak* [epjconf250499], 3-Kinetic Theory and Granular Gas
- P62 **Cyclic loading effects on flexible-bonded soft-rigid granular mixes**, *Mehdi Alam* [epjconf250012], 7-Geomaterials
- P63 **Scaling laws for flows of jammed frictionless granular materials between parallel plates**, *Michio Otsuki* [epjconf250511], 4-Jamming, rigidity and shear-thickening transitions
- P64 **The effect of shear strain on shear thickening in dense suspensions**, *Ankita Jain* [], 2-Rheology and constitutive modelling
- P65 **On the systematics of rheological measurements of gas fluidized grains**, *Marlo Kunzner* [epjconf250747], 2-Rheology and constitutive modelling
- P66 **Atmospheric effects on high-velocity impact cratering in porous sandstones**, *Shachi Singh* [epjconf250530], 6-Geophysical, environmental and planetary processes
- P67 **Exploring inertial effects in the flow of granular media: double-scale approach MPMxDEM**, *Gael Combe* [epjconf250542], 9-Particle-based numerical methods
- P68 **Powder rheological characterization of dry battery coating materials**, *Kartik Pondicherry*, 10-Experimental methods for granular mechanics
- P69 **Transport coefficients and normal stress differences of a simple sheared monodisperse and bidisperse granular gas**, *Pallvi Badhan* [], 3-Kinetic Theory and Granular Gas
- P70 **Dynamics of regolith dunes on small planetary bodies**, *Kumar Gaurav* [epjconf250750], 6-Geophysical, environmental and planetary processes
- P71 **Modelling laser beam absorption for powder-based sintering**, *Thomas Weinhart* [epjconf250531], 12-Emerging topics
- P72 **Dynamics of particulate materials discharged in a granular vibration pumping system**, *Masato Adachi* [epjconf241991], 12-Emerging topics
- P73 **The granular column collapse: a retrospective**, *Miguel Cabrera* [epjconf250475], 6-Geophysical, environmental and planetary processes
- P74 **Rheological study of granular flows through a hopper: a comparative study**, *Satyabrato Patro* [epjconf250757], 2-Rheology and constitutive modelling

- P75 **Simulating the 3D photoelasticity problem in order to generate training images for deep learning**, *Peidong Yu* [epjconf250713], 10-Experimental methods for granular mechanics
- P76 **Validation of the most probable disordered packings by experiments on the loose and close states**, *Calixtro Yanqui* [epjconf250490], 4-Jamming, rigidity and shear-thickening transitions
- P77 **Examining the effect of particle size distribution on dry density of granular materials in laboratory deposition**, *Istvan Talata* [epjconf250759], 12-Emerging topics
- P78 **Shear localisation in assemblies of granular chains**, *Palash Sarate* [], 7-Geomaterials
- P79 **Notes on global permeability – grading curve expressions of granular matter**, *Emoke Imre* [epjconf250974], 12-Emerging topics
- P80 **Measuring interparticle adhesion in cohesive granular media**, *Maxime Lajeunesse* [epjconf250533], 10-Experimental methods for granular mechanics
- P81 **Effect of particle gradation on pullout response of geogrids: a micromechanical perspective**, *Amrisha Khandelwal* [epjconf250536], 7-Geomaterials
- P82 **Comparing the effect of particle size distribution on minimum dry density in laboratory deposition and DEM emax test**, *Emoke Imre* [epjconf251025], 12-Emerging topics
- P83 **Effects of particle shape irregularity on the microstructure of granular materials**, *Farhang Radjai* [epjconf250218], 7-Geomaterials
- P84 **Experimental analysis of basal wall friction coefficient for a velocity-controlled confined granular flow**, *Li Yu Lai* [epjconf250589], 10-Experimental methods for granular mechanics
- P85 **Multi-material spreading strategies for functionally graded material manufacturing in LPBF**, *Shakti Choudhury* [epjconf250413], 12-Emerging topics
- P86 **Turbulent flow of gas solid suspension through vertical and horizontal duct**, *Manaswita Bose* [epjconf250780], 8-Particulate multiphase flows and porous media
- P87 **Low to high shear rate powder rheology in a rotational rheometer**, *Max Winkelmann* [epjconf250612], 11-Powders and grains in pharma and food processes
- P88 **DEM Investigation of separation performance and stress analysis of a five-deck industrial screen**, *Soni Jaiswal* [epjconf250608], 9-Particle-based numerical methods

- P89 **Stress distribution in elastic disks with a hole under uniaxial compression**, *Ken Okamura* [epjconf250588], 7-Geomaterials
- P90 **Dynamical heterogeneity in shear-jammed granular systems**, *Yiqiu Zhao* [epjconf250520], 4-Jamming, rigidity and shear-thickening transitions
- P91 **Rheology of high speed granular flows in presence and absence of air**, *Satyabrata Patro* [epjconf250748], 2-Rheology and constitutive modelling
- P92 **Pressure and shear waves in lightly-confined granular columns**, *Vasu Paliwal* [epjconf250566], 6-Geophysical, environmental and planetary processes
- P93 **Microstructural study of liquefaction in highly polydisperse granular media**, *C. Castro-Malaver* [epjconf250728], 7-Geomaterials
- P94 **Granular heaps**, *Aqib Khan* [epjconf250712], 6-Geophysical, environmental and planetary processes
- P95 **Tuning multi-lengthscale structures in fluids via cooling and heating cycles**, *Sutapa Roy* [epjconf250842], 12-Emerging topics
- P96 **Contact mechanics of soft granular materials with capillary interaction**, *Jiayin Zhao* [epjconf250735], 8-Particulate multiphase flows and porous media
